CUBE™ 4

15 Watt

Features

- **15 Watts** continuous wave power
 - **World's first four wavelength laser** - simultaneous or independent - 660nm | 800nm | 905nm | 970nm
 - Modulation +1-20,000 Hz
 - **Intense Super Pulse (ISP) - Peak: 20W | Average: 12W**
-
- Lightweight - less than 3.5 lbs
 - Precision, variable cooling
 - Lithium ion rechargeable battery with up to **75 minutes** of treatment time per battery charge
-
- **Industry's first Solid State Diode module**
-
- Intuitive software with pre-set protocols
 - Easy software update via USB
 - Customizable protocols
 - **Electronic Medical Records**
-
- **Quick Release Technology** with Ear Nose & Throat (ENT) Available
-
- **3 Year** K-Care warranty included, **Lifetime** diode warranty

Benefits

- Increases circulation
 - Targets the body's four natural light absorbing complexes
 - Shortest treatment time for fast ROI
 - Different tissues respond to different frequencies
 - Deep penetration without heat build up
-
- **Unparalleled portability**
 - Apply treatments with or without access to power
 - Seamlessly transport laser between rooms or locations
-
- **Highest optical efficiency**
 - Prevents thermal and mechanical stress
 - **Durability**
 - Increased battery life
-
- Quick patient history access
 - Protection from obsolescence
 - Modify and save settings by patient
 - Easily repeat last treatment from EMR
-
- **Versatile** and **Expandable** for a variety of treatment applications including contact or non-contact therapy
 - Switch attachments in seconds
-
- Peace of mind **Protection**

CUBE™ 3

12 Watt

Features

- **12 Watts** of Continuous wave power - also available in 8 Watt
- Three wavelength laser - simultaneous or independent - 660nm | 800nm | 970nm
- Modulation +1-20,000 Hz
- **Intense Super Pulse (ISP)** - **Peak: 15W** | Average: 8W
- Lightweight - less than 3.5 lbs
- Precision, variable cooling
- Lithium ion rechargeable battery with up to 60 minutes of treatment time per battery charge
- Intuitive software with pre-set protocols
- **Electronic Medical Records**
- Customizable protocols
- Easy software update via USB
- **Quick Release Technology** with Ear Nose & Throat (ENT) available
- 2 Year manufacturer's warranty, Lifetime diode warranty

Benefits

- Increases circulation
- Rapid treatment time for fast ROI
- Broad absorption disbursement
- Different tissues respond to different frequencies
- Deep penetration without heat build up
- **Unparalleled portability**
- Apply treatments with or without access to power
- Seamlessly transport laser between rooms or locations
- Quick patient history access
- Easily repeat last treatment from EMR
- Modify and save settings by patient
- Protection from obsolescence
- **Versatile and Expandable** for a variety of treatment applications including contact or non-contact therapy
- Switch attachments in seconds
- Peace of mind protection

K-SERIES

12 Watt

Features

- 12 Watt continuous wave power
- Dual wavelength - simultaneous or independent - 800nm | 970nm
- Intense Super Pulse (ISP) - Peak: 15W | Average: 6W

-
- Lightweight - less than 3.5 lbs
 - Lithium ion rechargeable battery with up to 60 minutes of treatment time per battery charge

-
- Intuitive software
 - Easy to update via USB
 - Ability to save 120 custom settings
 - Ability to save 65 favorite settings
 - 2 year manufacturer's warranty, Lifetime diode warranty

Benefits

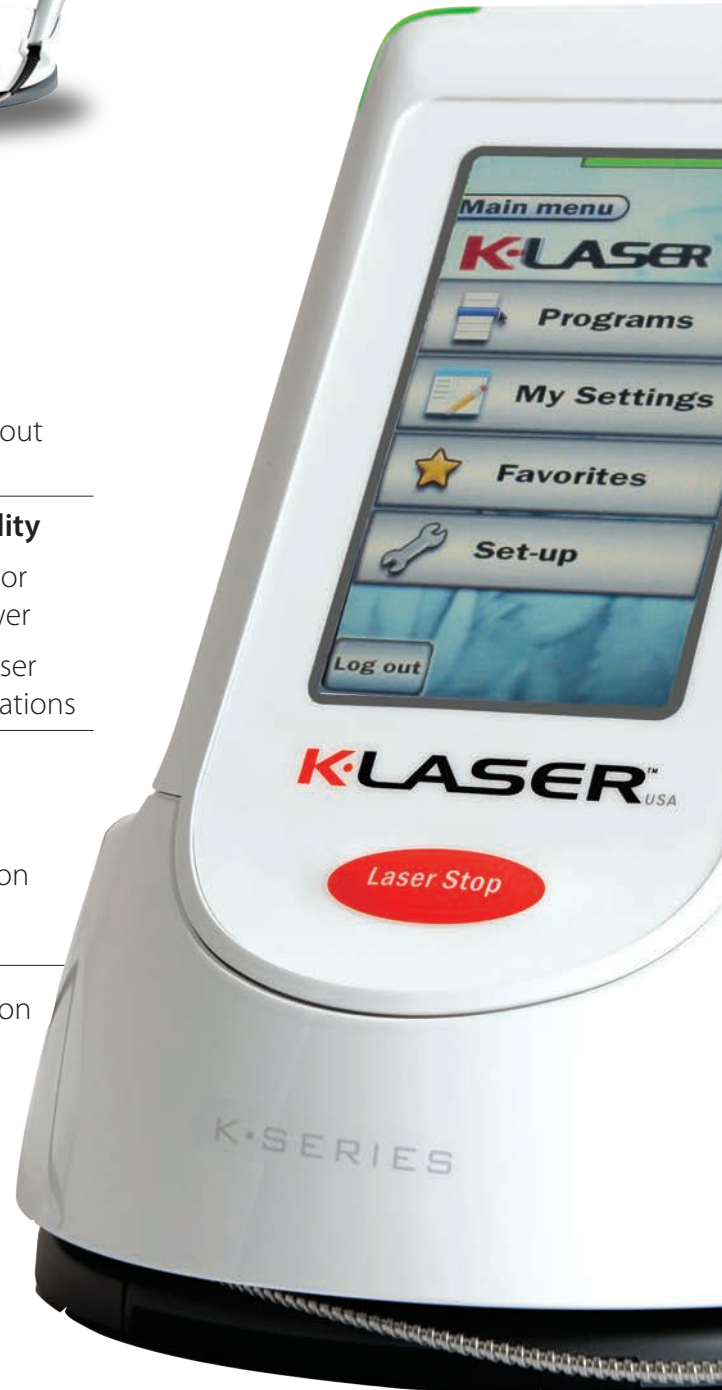

- Increases circulation
- Short treatment time
- Broad absorption disbursement
- Deep penetration without heat build up

• **Unparalleled portability**

- Apply treatments with or without access to power
- Seamlessly transport laser between rooms or locations

-
- Easy access to favorite settings
 - Quick access to common protocols

-
- Peace of mind protection

ACCESSORIES

Carts

Providing optimal operator comfort, the height adjustable carts feature a magnetically secure base for attaching the laser. With lockable casters, the carts allow for superior mobility and doubles as a charging station for your laser.

Cases

A completely mobile transport system, the K-Laser case collection provides cushioned inserts and a durable exterior to protect your investment. Cases are available for the Cube and K-Series lasers.

Goggles

With the specific wavelengths utilized by K-Laser, eye protection must be rated with an Optical Density of 5+. K-Laser goggles offer protective eyewear for you and your patients.

K-Caps

The disposable K-Caps eliminate the need to sterilize the treatment tip between uses. By providing a clean barrier between the therapy tip and patient, the risk of cross contamination is greatly reduced.

REVOLUTIONIZING LASER THERAPY

K-Laser provides solutions for the medical, veterinary and scientific fields; dedication to developing the best equipment; and providing customers the ultimate in laser therapy.
